ABOUT ME

I am a junior software developer with a foundation in JavaScript, React, and Node.js. Through internships and real-world projects, I have gained practical experience in both front-end and back-end development by building user-focused web applications and RESTful APIs. I am eager to continuously improve my technical skills and contribute value within productive, collaborative teams.

EDUCATION AND TRAINING

2021 – 2025
B.SC. IN COMPUTER ENGINEERING Kocaeli University

Final grade 3.28/4.00

LANGUAGE SKILLS

Mother tongue(s): **TURKISH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	B2	B2	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Frontend

JavaScript(ES6+) | React | Postman | CSS3 | Tailwind CSS | Redux | Material UI | Responsive Design

Backend

Node.js | Express.js | RESTful API design | Authentication & Authorization

Databases

MongoDB | PostgreSQL | MySQL

Tools & Practices

Git & GitHub | CI/CD concepts | MVC architecture | JSON, API integration | Docker | HTML5

WORK EXPERIENCE

FRONTEND DEVELOPER INTERN – OBSS TECHNOLOGY – 07/2024 – 09/2024 – İSTANBUL, TURKEY

- Developed interactive and user-friendly interfaces using React.
- Worked on game-oriented UI components, focusing on usability and performance.
- Contributed to desktop application development using Electron.
- Gained exposure to WebGL and 3D graphics concepts.
- Participated in team-based development and code reviews.

SOFTWARE DEVELOPER INTERN – XYZ TECHNOLOGY – 07/2023 – 09/2023 – İSTANBUL, TURKEY

- Worked on backend development using C# and .NET.
- Implemented a system to synchronize error codes between backend and frontend.
- Collaborated closely with frontend developers to ensure API consistency.

https://github.com/OttomanBull/ErrorSynchronizationProject

PROJECTS

Contact Form Management System

React – Redux – JavaScript
Contributed to the frontend development of a contact form management system.
Built reusable React components and managed global state using Redux.
Integrated existing RESTful APIs and implemented authentication flows
on the client side, focusing on usability and secure data handling.

Spider Solitaire Game

JavaScript – HTML – CSS
Developed a Spider Solitaire game focusing on game logic, state management,
and drag-and-drop interactions.
Implemented card movement rules, sequence validation, and hint mechanisms.
Managed complex state structures to handle multiple columns and card stacks,
with emphasis on correctness and user interaction.

Memoir Blog – Backend

Node.js – Express – MongoDB – JWT
Co-developed the backend of a personal blogging platform.
Responsible for implementing authentication and authorization mechanisms,
designing RESTful APIs for post creation and editing, and developing reusable
Express middleware for security and error handling.
Focused on clean architecture and maintainable API design.
